Dear Mr. Mills:

We recently received a letter concerning Case No. 97-073 (New Haven Cell Facility), regarding an application by Cellular Information Systems of Florence, Inc., for the construction of a cellular phone communication tower in eastern Hardin County, Kentucky. The Commission's Vernon-Douglas State Nature Preserve lies immediately north of the proposed location for this tower (see enclosed map), and the land that it is proposed to occupy lies within our "preserve design" boundary, indicating that it is land that we would like to obtain eventually from willing sellers to help protect the natural integrity of the preserve.

This nature preserve is a publicly owned tract that has been dedicated to protect a unique natural community representative in the Knobs subregion of Kentucky. We believe that the presence of the tower will detract from our ability to protect the site. Moreover, a loop trail within the preserve is situated in such a way that the tower would be clearly visible from its southern portion. For these reasons, we request that the applicant attempt to locate another suitable location for the tower that lies outside of our preserve design boundary.

Thank you for your consideration of our concerns. Please notify us if you approve this application so that we can assure that safety and liability concerns are fully addressed in the design process.

Sincerely,
